

# Columbus Hand Therapy

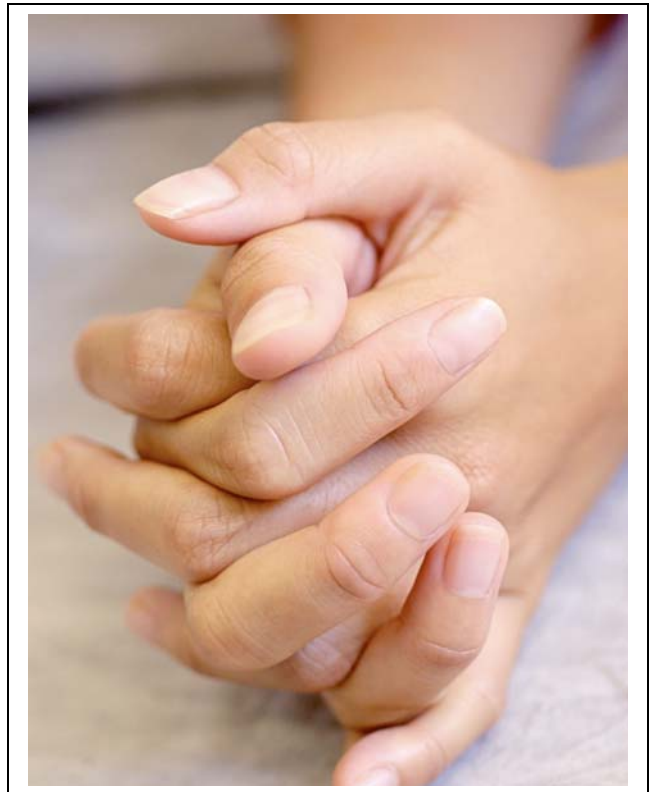

NOW providing ErgoScience

## F.unctional C.apacity E.valuations

No longer will you have to read through 20 pages of material to find out the bottom line:

What is this worker able to do?

ErgoScience FCE reports are validated, researched, objective and reliable measures of work capacity. Reports can be customized for individual businesses if needed. Assessment performed by a experienced, licensed professional. Components measured include: lifting, repetitive squatting, stair climbing, pushing, pulling, dexterity testing, grip strength, bilateral carry, unilateral carry, balance, trunk rotation, overhead work, ladder climbing, coordination, and endurance  
Summary reports at a glance!

- Rapid reporting-same or next day turnaround!
- No-wait-scheduling
- Rule out self-limiting behavior
- Measure residual functional capacity
- Data for disability determination
- Assist your workers to get back to work at their highest level
